

Simply Firmly Closely. Connected.

IDEAL-Hose Clamps DIN 3017

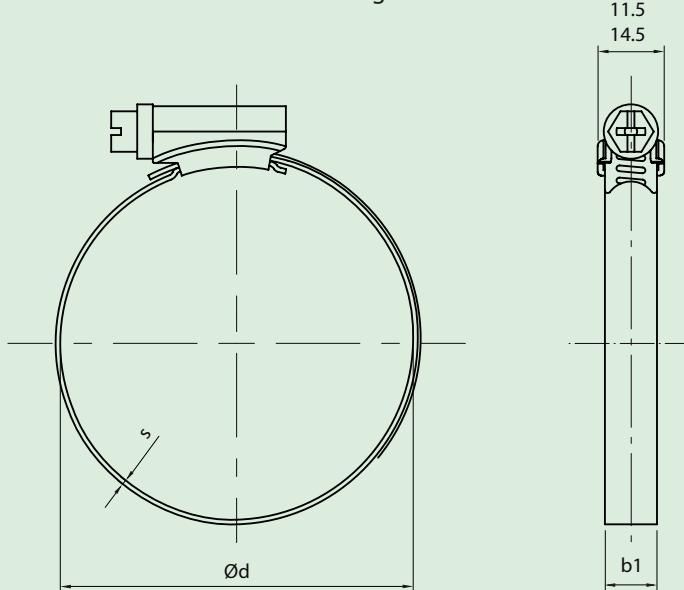

IDEAL-Hose Clamps

IDEAL-Hose Clamps DIN 3017

Connection technology. Robust and reliable.

The clamp for the more challenging standard applications has stood the test thanks to its high clamping force levels with a narrow band width and low weight.

9 mm and 12 mm band width

- High clamping force levels
- Strong connection
- Compact design
- Closely graduated diameter range from 12 mm
- Customer requirements determine max. diameter

Material qualities

W1

Band, casing	Shiny galvanised steel	Low-level corrosion resistance. Cr (VI) free.
Screw	Shiny galvanised steel, blue passivate	
Screw head type	Slotted hex head screw	
	SW 7 mm with integrated cross-tip	

W2

Band, casing	Chrome steel, material 1.4016	Low to medium-level corrosion resistance.
Screw	Shiny galvanised steel, blue passivate	Material combination allows for even corroded connections to be removed at any time.
Screw head type	Slotted hex head screw	
	SW 7 mm with integrated cross-tip	

W4

Band, casing, screw	Chrome nickel steel, material 1.4301 (V2A)	High-level corrosion resistance and finish quality.
Screw head type	Slotted hex head screw SW 7 mm	

W5

Band, casing, screw	Chrome nickel steel, material 1.4401 (V4A)	Top level corrosion resistance (resistant to sea water). Highly magnetisable.
Screw head type	Slotted hex head screw SW 7 mm

Band dimensions

The material thickness of the casing of up to 1.2 mm provides for a particularly robust casing form, ensuring a stable connection between screw and band. High tightening torque levels are achieved at low idling torques. This optimum level of efficiency results in high clamping force levels.

Other Products

IDEAL-MAXI

20 mm band width:

- Robust applications
- Highest tightening torques
- Wide clamping range
- Easy to use
- Diameter from 60 mm
- Customer requirements determine max. diameter

IDEAL-small

5 mm band width:

- Low height
- Space-saving assembly
- High-level of flexibility
- Diameter range from 7 mm
- Customer requirements determine max. diameter
- Advantage of a wider clamping range and can be adjusted and re-used

T-bolt clamps

- High clamping force for securing heavy, smooth hoses
- Easy and quick to fit
- Re-usable

Spring clamps

Spring clamps, spring-loaded:

- Material:
Round steel wire as per EN10270-1:2001
- Finish:
White zinc coating CrVI free as per RoHS standard

Spring clamps, screwed:

- Material:
Round steel wire as per EN10270-1:2001
- Finish:
White zinc coating CrVI free as per RoHS standard

Accessories

- Workshop range
- Screwdrivers
